

**MICROTECHNOLOGY**

# FUTUREPATH HYBRID 3-WAY

- FuturePath configuration mixing a popular MicroDuct size with a common Smoothwall duct size
- A perfect choice for customers who need to place micro cables and larger standard fiber cables at the same time, or would like to plan for future possibilities
- Multiple pathways for one installation cost, allows flexibility and future growth
- No special tools or equipment needed. Installation uses the same as traditional conduit or innerduct

**CONFIGURATIONS**

- 1 1/4" SDR 11 (1) + 18/14mm MicroDucts (2)
- 1 1/4" SDR 13.5 (1) + 22/16mm MicroDucts (2)
- 2" SDR 13.5 (1) + 22/16mm MicroDucts (2)

**INSTALLATION TYPES**

- Plow
- Trench
- MicroTrench
- Directional Bore
- Tray

**STANDARD COLORS**

Oversheath
 
 MicroDucts
 

 Custom colors available

FEATURES

<b>STANDARD</b>
<p><b>SPECIFICATIONS/DETAILS</b> FuturePath configuration consisting of two or more different sizes of conduit and or MicroDucts. Manufactured from flexible HDPE (High Density Polyethylene). All Smoothwall conduit dimensions meet or exceed one or more of the following: ASTM F-2160, ASTM D-3350, ASTM D-3485, NEMA TC-7, UL 651A, UL 1990, Bellcore GR-356.</p>
<p><b>FILL RATIO</b> Choose the correct MicroDuct size based on the Outer Diameter (OD) of desired MicroCable. Dura-Line recommends a fill ratio of 50% to 75% for optimal cable placement performance. Several factors impact jetting distance including the condition of route, bends, and equipment.</p>
<p><b>CONDUIT MARKINGS</b> Permanent marking along FuturePath includes: material, relevant standards, production info, and sequential feet or meter markings. Custom options available.</p>
<p><b>CO-EXTRUDED LINING</b> SILICORE® ULF (Ultra-Low Friction) is co-extruded inside the HDPE wall creating a slick, permanent, interior lining. SILICORE® ULF exhibits no loss in performance over time or in extreme temperature conditions.</p>
<p><b>INTERNAL RIBS</b> Standard on MicroDucts, available as an option in the Conduits</p>
<p><b>LOCATE WIRE</b> Available with or without a 20 AWG insulated copper wire</p>
<p><b>RIP CORDS</b> For easy opening of the oversheath</p>
