

STANDARD ACCESSORIES

LUBADUK®

- Reduced cable tension – up to 74% less friction and 50% less pulling tension than with other lubricants – greatly reduces the wear on cable pulling equipment and improves safety
- Increased pull lengths mean fewer setups
- Cost-saving – fewer pull boxes needed
- Direct application into the duct before the pull reduces wear on cable pulling equipment
- Unique shear-sensitive carrying agent holds a dispersion of silicone oil and microspheres in suspension.
- Microspheres are tiny ball bearings, with diameters between .010" and .020", which keep friction between cable and conduit extremely low
- Available in standard or Winter grade (-40°F)
